

SURFACE-MOUNT *SHAFTLESS*TM SKYLIGHT Reg. Design

The world's first Surface-mountable *Shaftless*TM Skylight System.

illume skylights easily install to any level of a home without the need for a light shaft, flexible tube or large roof cavity.

Surface-mountable models offer the ability to include dynamic sky-lighting into tricky or non-standard installation locations, such as timber and tin ceilings. Also, the surface-mountable design avoids interference to insulation and concealed electrical cabling.

Advantages of an illume system

- ▶ Innovative *Shaftless*TM design
- ▶ Works without a light shaft or flex-tube
- ▶ Can be installed practically anywhere
- ▶ Suitable for metal deck or tiled roofs
- ▶ Sealed unit which won't leak or collect insects
- ▶ Doesn't transfer UV, heat or noise indoors
- ▶ Batteries or mains power aren't required

illume *Shaftless*TM Skylight Systems

*Have you ever seen a skylight in a high-rise apartment?
Perhaps only on the top floor..*

Our new innovative skylight system allows every room on any level of a multi-storey building to benefit from the addition of dynamic smart sky-lighting by way of the innovative *Shaftless*TM design.

The illume *Shaftless*TM Skylight System adds the ambiance of sky-lighting to homes where under normal circumstances a traditional skylight can't be fitted.

This innovative solution opens up an entirely new range of possibilities to home renovators who can now create beautiful, dynamically lit areas from the darker parts of everyday homes.

As with traditional skylights, elements such as the time of day and the presence of cloud cover affect the lighting levels that an illume skylight emits. This is by way of illume's fully automated lighting control system.
